## Hobberlin Spring and Summer Samples Have Arrived.

Your interest will be aroused in the arrival of new Woollens for the Spring and Summer Season, from Hobberlin's Values are down, Quality is Better, and the Styles are most sensible.

For the short time we were open in January we sold twenty-three suits, and eleven pairs of extra trousers, which speaks for itself. Those to hand so far have proved entirely satisfactory. Judging from the sales we have had so far this month, we will easily surpass last month's record.

Come in and look over our samples and save 33 1/3 p.c. discount.

Special prices on innumerable lines for this week from Groceries and Dry Goods.

Happenings Here, There and Everywhere, Past Present and Future

### Chinook School Trustee Meeting

The first meeting of the Board of Trustees for Chinook Consolidated District was held in the School on Jan. 15.

All members of the Board were present. Mr. Rideout was re-elected Chairman.

Mr. Lorne Proudfoot was engaged as secretary at a salary of \$300, same as last year.

The minutes of last meeting were read and adopted.

Messrs. Rideout and Varcoe be a committee to secure tables for the kitchen.

A number of accounts were ordered to be paid.

C. W. Rideout, chairman and L. Proudfoot, Sec'y, were authorized by the Chinook S. D. to draw, accept, sign and make all or any Bills of Exchange, Promissory Notes, Cheques and Orders for the payment of money, to pay and receive all moneys, and to acquittance for the same; to assign and transfer to the Bank all or any Stocks, Bonds, and other securities; from time to time to borrow from the Union Bank of Canada, either by overdrawing the account of the undersigned or otherwise, and generally for and in the name and on behalf of the said School District to transact with the said Bank any business they may think fit.

Also that C. W. Rideout and L. Proudfoot, or any one of them be authorized to negotiate with and deposit with, or transfer to the said Bank, but for the credit of the said S. D.'s account only, all or any Bills of Exchange, Promissory Notes, Cheques or Orders for the payment of money, and other negotiable paper, and for the said purpose to endorse same, or any of them on behalf of the said S. D. Also from time to time to arrange, settle balance and certify all books and accounts between the School District and the Bank, and to receive all paid cheques and vouchers, and to sign the Bank's form of settlement of balances and release.

The following are the estimates for the year:

Expenditure	
Conveyance of Children	\$8,000
Teachers' Salaries	5,600
Janitor's Salary	900
Sec. Treas., Salary	300
Debt Payments	2,000
Fuel	600
Supplies and Equipment	500
Other Expenditure	500

Total \$18,400

Receipts	
1921 Taxes	\$16,000
Government Grant	4,000

Total \$20,000

A copy of these estimates as well as a copy of the Auditor's report was sent to the Union Bank, Chinook.

Mr. C. W. Spicer returned from Calgary last week.

Remember the Chinook Bazaar commencing Wednesday, February, 16.

Mr. James Ray, of Stoppington, is visiting his brother, Chas. Ray for a few days.

The spirit of reciprocity between man and the mechanic, merchant and farmer, result everytime in making a town a perfect one to do business in.

Mr. Cameron spent the weekend with his nephew on his farm.

Two million dollars is to be spent by the Imperial Oil Co., drilling for oil in Alberta during the present year.

Misses Ethel McRae and Alma Cadwell, who have been visiting friends at Youngstown, Gilbert and Keystone, returned last Saturday.

Auction sale bills printed at this office.

A masquerade dance will be held under the auspices of the Chinook Agricultural Society on Friday, Feb. 25, in the Chinook School. Prizes will be given for the best dressed lady and gentleman and for the best comic costume.

Mr. C. E. Berry made business trip to Calgary this week.

Mr. J. K. Yeates, who has been working in Drumheller for several weeks, returned on Saturday.

Mr. John Key returned home Thursday after spending several weeks at Rowley, Alta.

Arthur Drennon, who has been managing the Alberta Pacific elevator for the last month, returned to Calgary last Saturday.

J. L. Carter was a visitor in Youngstown last Friday.

Mr. and Mrs. A. McAlister are visitors in Calgary this week.

### Gordon Elected With Big Majority

The West Peterboro election resulted in a win for the liberal candidate by a majority of 1,300. With five candidate in the field it was not expected that the turnover would be so sweeping.

With one poll to hear from the standing is as follows:

Gordon, 4,165; Denne, 2,844; Burnham, 2,497; Campbell, 2,497; McMurray, 1,011.

The tax rate for the year 1921 was set at 14 mills on the dollar. The sum of \$12,000 is required to meet the expenditure of the School District until such time as the taxes levied for the current year are available, the Chairman and Treasurer were authorized to borrow that amount from the Union Bank of Canada.

The next meeting of the Trustee Board on Saturday, February 19, at 2 p.m.

## Governments as Business Concerns

(Second Article)

In last week's article under the above heading situation was directed to the huge experiments now being carried on by the Dominion Government in the ownership and management of a great railway system, with the largest mileage under one control in the world, and of an ocean-going mercantile marine consisting of scores of vessels plying to ports throughout the world. It is now proposed to outline some of the business enterprises in which Provincial Governments in Canada are engaged.

While some experiments in the management of undertakings which may be regarded as commercial had been made by Provincial Governments, it was not until the creation of the new provinces in the Prairie West that anything remarkable and on a large scale was attempted. The new provinces of Saskatchewan and Alberta had hardly been inaugurated, however, before a demand arose that the Governments should take over, operate and extend the telephone systems. This demand developed almost simultaneously in all three Prairie Provinces. With the exception of the Exchanges in the larger cities, like Winnipeg and Calgary, the telephone systems were meagre, unimportant and with no great investment of money involved. In this respect the situation was entirely different from that prevailing in the older provinces. At a comparatively small investment, therefore, it was possible for Western Governments to buy out the existing private companies and commence the work of creating and extending Government-owned and operated systems.

There were not lacking people who predicted disaster, but with the experience of older countries to guide them, and possibly also because Western people are not quite so conservative and bound by tradition, there was a practically unanimous demand that a service which in its very nature had to be a monopoly, should be owned by the people themselves. The experiment was undertaken, and experience has demonstrated its wisdom. No part of Canada, and with the possible exception of some parts of the United States, no country in the world enjoys a more extended or successful telephone service, nor a cheaper service, than the people of the three Canadian Prairie Provinces.

In Manitoba and Alberta the service is wholly Government-owned and operated, but in Saskatchewan the Government owns and operates all the Exchanges and long distance lines, while the rural party lines are owned by co-operative companies of the people directly concerned, assisted by the Government, and connected with the Government lines and as an integral part of the whole Provincial system. Some people hold the view that the Manitoba and Alberta plan is best; others favor the Saskatchewan plan. Both are giving almost complete satisfaction in their respective provinces, and it is an acknowledged fact that under the Saskatchewan plan the extension of rural lines has been more rapid, and the service equally as cheap and good, as in the neighboring provinces. No one would even suggest a return to the old privately-owned systems which are still in vogue in other provinces, especially as each of the three Government systems are linked together and thus provide all the advantages of interprovincial service which one large company would afford.

In Ontario two large enterprises of a business nature have been undertaken, and both appear to be rendering splendid service to the public at reasonable rates and not causing financial embarrassment to the Government of that Province. First and foremost is the Hydro-Electric whereby the Provincial Government, working in conjunction with the municipalities, develops electric energy at Niagara Falls, and from other water powers, and transmits it throughout the Province, the various municipalities buying the energy in bulk and distributing it to users within their respective municipalities. The development and extension of the Hydro system in Ontario is working an industrial revolution in that Province.

Ontario's second business undertaking is the Government railway which taps the far northern mining and lumbering sections of the Province, and brings them into direct communication with the manufacturing and agricultural sections and centres of population. This railway has been an important agency in the development of the rich mineral resources of Ontario, has aided in the settlement of many thousands of acres of land, and has added enormously to the wealth of the Province and Dominion.

There are other business aspects to the work of Provincial Governments, particularly in the Western Provinces, but, as they are not under direct Government ownership and operation, a consideration of these other matters will be deferred for a future article.

## No Open Door To Oil Fields

Mounted Police Will Guard Every Route to the North.

The only way to get into the north during the coming spring and summer, by any route, will be to qualify for, obtain and carry clearance papers from the Royal Canadian Mounted Police. There will be no such thing as looking passage without them, and there will be no open door into the oil country on any other terms.

No flying machine of any type will be permitted to leave for the Mackenzie territory without clearing the police or without each of its passengers being certified by a medical officer as physically and mentally fit to make the trip.

## Catching a Halibut.

The halibut feeds on the bottom of the sea, and when hooked permits itself to be drawn toward the top without very much protest. The struggle commences the instant its nose emerges from the water, and the possibility of a fight is anticipated by a hard blow on the head. "This blow must be sure and hard, for if there is any compassion for the fish it is as good as gone, as any opportunity to struggle means its escape."

## Are Hard Times Coming?

Yes, for the man that wears tight boots, but his corns are relieved quickly by Putnam's Corn Extractor. No pain, and certain relief. That's Putnam's. Use no other, 25c at all dealers.

A French scientist advises tipping for a few minutes each day as the best exercise for keeping in good health and prolonging life.

No one need endure the agony of corns with Holloway's Corn Remover at hand to remove them.

The moon is small compared with the earth. Its area is almost exactly that of the whole of North and South America.

## What Winston Thinks.

Rt. Hon. Winston Churchill of proposed British Trade with Bolsheviki Russia: "It has yet to be proved that it was more of an adventure to seek to overthrow the Bolsheviki Government than to seek to live side by side with it."—Sunday Chronicle, London.

The blossom of the wattle, a tree of the gum family, has been adopted as Australia's national flower.

## "HEALING IN EVERY TONGUE" Zam-Buk

In Burns, Scalds, Cold-Sores and all skin diseases or injury you can depend upon Zam-Buk. It's really astonishing how swiftly and surely it banishes pain and restores and grows new healthy skin. Zam-Buk is a pure antiseptic herb which possesses a very definite and important medicinal action on the skin. In its character and in its results it is altogether different to the usual ointments and salves. Zam-Buk safeguards you against blood-poison and skin disease.

All dealers 50c. per box

## An Infant Prodigy.

Uroff Corra, of Catalonia, Spain, aged 3 years, who plays the piano with extraordinary skill, is the latest attraction at aristocratic tea parties in the Spanish capital. The infant prodigy is placed by his nurse on the piano stool, whereupon he begins his performance without any trace of nervousness.

## Bad Breath IS CAUSED BY CATARRH

Canadians suffer more from Catarrh than from any other disease. On this account Catarrh is dangerous and should be checked at the outset. It isn't necessary to take internal medicine to cure Catarrh. There is a faster method.

Doctors now treat Catarrh by sending a purifying, healing vapor through the breathing organs. In this way the germs of Catarrh are destroyed.

The only successful vapor treatment is CATARRHOZONE, which the patient breathes through a special inhaler to the real seat of the trouble. The rich, piney essence of Catarrhozone heal and soothe all inflamed surfaces. They effectively treat the nose, throat and lungs with a powerful antiseptic that destroys irritation at once.

Catarrhozone brings into the system the balsam of the pine tree. It relieves completely colds, coughs, catarrh, weak throat and bronchitis. Once tried, Catarrhozone is always used. Nothing so pleasant, so effective, so quick to relieve, so absolutely sure to permanently help. Accept no substitute. Large size lasts two months and costs \$1.00, small size 50c; sample trial size 25c; at all dealers.

## Strike Of Free Gold

Samples Of Ore Reach The Pas From Herb Lake.

A strike of free gold in the shaft at the Rex mine at Herb Lake, Man., at a depth of 245 feet, is reported. Samples of the ore show the gold shining through generously.

The vein measures close to four feet in width, and there has been several smaller strikes made on the course of sinking, but nothing to compare with this latest discovery.

The importance of this new find lies in the fact that it gives proof of gold enrichment at depth.

## WELL SATISFIED WITH BABY'S OWN TABLETS

Once a mother has used Baby's Own Tablets for her little ones she will use nothing else. Her use of them leads her to believe there is no other medicine to equal them for any of the many minor ailments of childhood. Concerning them Mrs. Eugene Boisvert, East Aldfield, Que., writes: "My baby was terribly constipated, but after the use of Baby's Own Tablets he is entirely well again. I am so well satisfied with the Tablets that I lose no opportunity in recommending them to other mothers." The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

## A Profitable Business.

In the swamps of Florida the hunting of "bee trees" is a profitable business. Record of wild honey deposits of more than 300 pounds in hollow trees has been noted. The trees are located by hunters who follow the flight of the bees. It requires keen eyesight and a compass.

## On The Witness Stand.

"The gentleman says he kissed you in the dark hall because he thought you were his wife."

"Nonsense."

"On your oath, was it not possible for him to make an honest mistake?"

"Yes, but it wasn't that sort of a kiss."—Judge.

Minard's Liniment For Diphtheria.

## Trip To the Moon

Rocket to Reach Moon to be Tried Out This Summer.

First trials of the rocket which it is hoped will reach the moon will be held early this summer, it is announced by Prof. Robert H. Goddard, of Clark University, the inventor. It will be designed so it will give off a flash when it strikes that will be seen from the earth. The force of the rocket will be smokless powder. Prof. Goddard explained that to reach an altitude of 25 miles a rocket weighing 25 pounds will be necessary. Of the total weight about 17 pounds will be powder.

He calculates that with an initial mass charge weighing 6,436 pounds he could expect an explosion large enough to be seen from the earth, through a telescope. This rocket would travel 6,000 to 7,000 feet a second.

State of Ohio, City of Toledo, Lucas County, J. Cheney makes oath that he is senior partner of the firm of F. J. Cheney & Co., doing business in the City of Toledo, County and State aforesaid, and that said firm will pay to said sum of ONE THOUSAND DOLLARS for any case of Catarrh that catarrh medicine.

Sworn to before me and subscribed in my presence, this 6th day of December, A. D. 1914.

(Seal) A. W. Gleason, Notary Public.

HALL'S CATARRH MEDICINE is taken internally and acts through the blood on the mucous surface of the System. Do not cure it by using free. Dr. J. Cheney & Co., Toledo, Ohio.

## Everybody Loses in War

World Needs a New Rule, Giving Life Instead of Bringing Death.

We have learned nothing from the last war if we deliberately enter upon a series of preparations for a new one. If such a course be necessary we have not a peace, but an armistice. We stopped the Germans and Austrians from wrecking the world, and then found there was no way to make them either repair the war damage or pay the costs of the war. They were powerless to do so if they desired ever so ardently to make full reparation.

Therefore, there is no such thing as success in war. The glitter and gold of war has been found to be a mere gilding of the habilitations of death; the stirring melodies of the military band lead only to the cemetery; the prancing war horse carries his rider to an unmarked grave; everybody loses.

What the world needs is a new rule giving life, instead of the old rule, bringing death. Billions spent for armaments by Great Britain, the United States and Japan would in another reign of suspicion and terror throughout all the nations.—From the Vancouver Sun.

## SHORT OF BREATH Could Hardly Walk Without Resting

When you go to a physician to be examined for any heart trouble one of the first questions he asks is: "Are you short of breath?"

Now, when the heart becomes affected there ensues a feeling of a choking sensation, a shortness of breath, palpitation, throbbing, irregular beating, smothering sensation, dizziness and a weak, sinking, all-gone feeling of oppression and anxiety.

On the first sign of the heart becoming weakened or the nerves unstrung Milburn's Heart and Nerve Pills are just the remedy you require. They regulate and stimulate the heart, and strengthen and restore the whole nerve system.

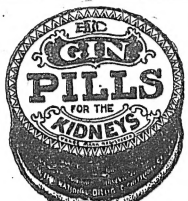

Mr. Stephen Cross, East Clifford, N.S., writes:—"I suffered for five years with heart trouble. I could hardly walk from the house to the barn without resting as I used to get so short of breath. Doctors could not help me. My wife told me to get a box of Milburn's Heart and Nerve Pills and I felt better after taking them; three boxes made me quite well. I am now helping my son to work the farm, and can truthfully say I feel like a different man."

Get a box at all dealers or mail direct on receipt of price to The T. Milburn Co., Limited, Toronto, Ont.

## Decentful Appearance.

She—I saw you driving yesterday with a gentleman. He appeared to have only one arm.

Her—Oh, no; the other arm was around somewhere.—Carnegie Tech. Puppet.

## "Oral Hygiene" Lay Education Series "YOUR TEETH"

If the ordinary processes of nature were unimpaired, it would not be necessary to extract the temporary teeth. They would extract themselves at the proper time. Normally the roots are absorbed as the time comes for the eruption of the permanent teeth and the crown, or business end of the tooth is left hanging to the gum. Some play a little extra pressure removes the baby tooth and in its place there is the tip of the cup of the permanent tooth that follows. If this natural system was always followed, a great deal of trouble would be avoided. Unfortunately, many causes operate to interfere with nature's perfect plan.

If the permanent tooth does not come directly under the temporary tooth, the absorption of the root will be either incomplete or it will not absorb at all. Sometimes long silvers of the temporary tooth roots are left and when the crown comes off, or an attempt is made to extract, these root pieces are left to wedge in the process between the permanent teeth. This condition always results in inflammation, sometimes causes serious abscesses, and often interferes with the effort of the permanent tooth to take its proper place in the arch.

Pieces of the roots of temporary teeth should never be left in the mouth.

Temporary teeth that are abscessed should always be removed regardless of the age of the child. When these teeth are lost before the time for their permanent successor to take their place, a retaining appliance must be made to hold the space so that the permanent tooth will not come in the wrong place. In nearly every case it is safe to give nitrous-oxide-oxygen as an anesthetic for children. Never allow a child to suffer any pain if you can avoid it. Either a local or a general anesthetic should always be given.

10th Century in 30 Minutes. Voltaire's *Samuel Johnson* will cure in 30 minutes the most stubborn cases of Itch, Mange, Psoriasis, Scabies, Eczema, Erysipelas, and all contagious scratches. Sold by druggists.

## Instructing the Farmers of To-Morrow

640 Students Enrolled in Alberta's Agricultural Schools.

Alberta is justly proud of its agricultural schools, at which this year there are 640 students, forty young men and women in attendance. The instruction given at these schools is free and includes subjects of practical value to future farmers, such as soil cultivation, crop growing, livestock raising, farm mechanics, dairying, poultry raising, and farm management, while the girls are taught cookery, sewing and home management.

The courses, which are given during the winter months, have proved very popular and to meet the growing demand for this kind of practical agricultural education, three new schools have been opened in different parts of the province this winter. The total cost of erection and equipment of them is said to have exceeded half a million dollars. In connection with each of these schools is a demonstration farm occupying about six hundred and forty acres. In addition to the school buildings are large barns and stables, silos, granaries, power house and homes for the teaching staff.

## Lloyd George

A Living Example of the Success of the Man Who Leads the Simple Life.

Admitting marvellous capacity, which many other men, have admitting honor, which is the equal possession of many other great statesmen, the peculiar strength of Lloyd George seems to be his absolute simplicity. His life has not been cluttered or cluttered by any of those petty ideas of prerogative which fritter away time, cause annoyance, and waste energy and strength to no good purpose. Lloyd George is a living example of the success of the man in the most strenuous position who leads the simple life.—Winnipeg Tribune.

## Co-operative Shipping.

A campaign for the development of co-operative livestock shipping in the southern part of Saskatchewan will be opened by the Provincial Government.

St. Peter's Church, Rome, will accommodate 54,000 persons, Milan Cathedral 37,000 persons, and St. Paul's Cathedral, London, 25,000 persons.

## "Here Comes The Bride!"

Everybody wishes her well! Happy and radiant she starts out on life's adventure. She should have health to begin with. Good looks in woman do not depend upon age, but upon health. You never see a good-looking woman who is weak, run-down, irritable, out of sorts, fidgety and nervous. Headaches, backaches, and troubles of that sort are all destroyers of beauty. Men do not admire sickness. It is within the reach of every woman to be well, healthy and strong if she will take Dr. Pierce's Favorite Prescription.

Toronto, Ont.—"Less than a year ago I was in a very poor state of health; my back ached dreadfully and I could scarcely drag myself around to do my household work. I started to take Dr. Pierce's Favorite Prescription and I cannot praise it too highly for the great benefit I received. My back-ache and pains disappeared entirely and I soon was restored to perfect health. I know that Doctor Pierce's Favorite Prescription is the best woman's medicine, for I have tried others that were recommended, and nothing has ever helped me so much as the Favorite Prescription."—Mrs. KENTON WILLIAMS, 18 Broadhead St.

Send 10 cents to Doctor Pierce's Invalids' Hotel in Buffalo, N. Y., for a trial package of Favorite Prescription Tablets.

## Prairie Tree Planting.

In Manitoba there is, as a rule, sufficient natural shelter in the shape of bluffs of poplar, willow, etc., to which the cattle or sheep can go for protection against the cold winds, but on the open prairies in Saskatchewan, and particularly Southern Alberta, the natural shelter is seldom available.

Protection from the wind in the shape of efficient windbreaks of trees is all that is necessary to maintain livestock in a state of health and contentment.—Dr. J. G. Rutherford.

It's not difficult to judge some men by their clothes—policemen and letter-carriers, for example.

## MOTHER!

"California Syrup of Figs" Child's Best Laxative

Accept "California" Syrup of Figs only—look for the name California on the package, then you are sure your child is having the best and most harmless physic for the little stomach and bowels. Children love its fruit taste. Full directions on each bottle. You must say "California."

## "DANDERINE"

Girls! Save Your Hair! Make It Abundant!

Immediately after a "Danderine" massage, your hair takes on new life, lustre and wondrous beauty, appearing twice as heavy and plentiful, because each hair receives so much nourishment. Don't let your hair stay lifeless, colorless, plain or scraggly. You, too, want lots of long, strong, beautiful hair.

A 35-cent bottle of delightful "Danderine" freshens your scalp, checks dandruff and falling hair. This stimulating "beauty- tonic" gives to thin, dull, fading hair that youthful brightness and abundant thickness—All suggests.

W. N. U. 1354

# Warfare On Weeds Must Be Unrelenting To Keep Land Clean

It is impossible to estimate even approximately the loss caused by weeds to Canadian agriculture. A bulletin recently published in the United States estimates the annual loss due to weeds in that country at more than \$300,000,000. Not long ago a western paper stated that the annual loss to farmers of Saskatchewan due to weeds was not less than \$25,000,000. If there is all loss in one province, the total in all Canada must be tremendous. There are many districts in the Dominion that stand high in weed production.

Weeds cause a direct, actual money loss such as those due to drought, hail or frost. There is also a loss in depreciation of property badly infested with weeds.

We do not know the full reason why weeds reduce crop yields, but it is well known that weeds deprive crops of moisture, plant food and sunlight, which cause decreased yields. A crop of grain or grass and clover seed which contains weed seeds will not grade No. 1, and there are certain weed seeds which it is well nigh impossible to screen out. Every time a sample of grain or grass seed drops a grade the price is lowered.

Weeds cause much extra work. They must be handled a number of times in a grain crop, and extra ploughing and cultivating are necessary in a weed-infested field if a crop is to be obtained. Net profits are reduced because of increased cost of production and of cheaper product. In a sense, farming is a war on weeds. This warfare must be unrelenting and relentless if the farmer is to emerge victorious. Many

men make a start to clear their farms of weeds but quit too soon. The campaign is stopped when success is in sight. The plan of attack must be carefully made and faithfully carried out. Every farmer should be his own weed inspector and his own weed eradicator.

Lack of careful planning with reference to weeds is too frequently evident throughout Canada. One man puts in more hoeed corn than he can properly care for; another fails to follow a short or systematic rotation of crops; still others fail to give the land sufficient preparation for their crops, or sow seed that is foul with weed seeds. It is because these things have not been given sufficient consideration in the past that the evil conditions of to-day prevail.

The weed problem is one of national concern and calls for active co-operation on a large scale. Every member of the community is affected and should lend assistance. Farmers, weed inspectors, owners of vacant property, township and county councils, and governments must work together if weeds are to be held in check.

The problem is how to get rid of weeds and keep them out. First, follow a short rotation of crops; cultivate the land thoroughly and often; prevent weeds going to seed; clean all seed before it is sown.

If the grain field is weedy, seed it heavily to clover and grass; mow the annuals and biennials before they seed, and pasture closely to keep down perennials; followed by a hoe crop or smother crop the most varieties of weeds will be checked.—F. C. Nunnick.

## Experimental Farm At Swift Current

Work On New Building to be Rushed When Weather Permits.

Work on the new experimental farm established by the Dominion Government at Swift Current, which started last year and is now suspended on account of the winter, will be continued as soon as the season opens again, according to Dr. J. H. Grisdale, deputy minister of agriculture, Ottawa.

The work carried out last year consisted chiefly in fencing the land and bringing in material for the buildings to be erected thereon. Construction will commence in the spring and the farm establishment pushed to completion.

## Boer War Trophies

Britain to Return to South Africans War Relics of Other Days.

On the occasion of a brilliant review at Johannesburg, Prince Arthur of Connaught, Governor-General of the Union of South Africa, amid enthusiasm, announced that at the instance of Premier Gen. Jan. Christiaan Smuts, King George had taken steps to secure the return to the Union Government of war trophies in the form of figures and plaques originally intended as part of the memorial to Kruger at Pretoria.

The figures and plaques have recently been in the residence of the late Field Marshal Kitchener at Bloome Park and incorporated in the memorial to the Royal Engineers at Chatham.

## Decrease in U. S. Livestock

Value of livestock on farms, and ranges in the United States has decreased more than two and a quarter billion dollars during the last year and the amount of livestock about ten billions. Cattle and sheep decreased in number more than four per cent, and swine decreased more than seven per cent. There was a decrease in the value of more than a billion dollars in milk cows and about the same for other cattle, while swine showed a decrease of almost half a billion dollars and sheep almost a quarter of a billion dollars.

## Stole a Railway and Stock

A railway line and stock are difficult things to steal, but according to a story even this theft has been accomplished, in the Rumanian Province of Transylvania, says a special cable from Vienna to the New York Times.

Man may be as deceitful as woman in some things, but he never tries to transform a yawn into a smile.

W. N. U. 1354

## Activity At Camp Borden

Mild Weather Aids Training of Officers for Air Force.

Training of officers of the Canadian Air Force is going on apace at Camp Borden, where some 500 officers are now taking courses and flying is going on every day. The mild weather has been most helpful in the winter training of fliers. It is stated, and machines have been mounted on either skis or wheels, according to the amount of snow covering the ground. There has not been sufficient snow or bad weather at any time to interfere with the regular training courses.

## A New World

National Policies of Great Countries Lamentably Deficient in Christian Spirit.

Viscount Grey of Eldon, speaking at a Student Christian Movement conference at Glasgow recently on the need and possibility of a new world, said that a change in the external conditions alone would not make a better world. The national policies of the great countries were still lamentably deficient in Christian spirit. Regarding Egypt and India, Lord Grey said that the European War had immensely diminished the prestige of Christian civilization in those countries. If the relations between East and West were to improve, the foundation must be the restoration of the prestige of Europe. Even in this country there was more violence and less liberty than before the war, and the moral was that the nations must combine to prevent war.—The London Times.

## Dairying In the West

Alberta is the Only Province to Increase Production.

This year Alberta is the only western province to show an increase in dairy production. Full and accurate returns are not in as the end of the Alberta year count has been a careful estimate by C. Marker, dairy commissioner, who is not likely to exaggerate, shows an increase in dairy products of nearly three million dollars.

Manitoba and Saskatchewan have both decreased somewhat. The rather marked decrease in cheese-making in Manitoba does not indicate a decreased interest in dairy farming. In the more densely settled districts of the province, but only that with the increased demand for milk in the city of Winnipeg, dairy farmers are finding an increased market for their raw product.

The average price of creamery butter for the three prairie provinces has been very close, showing the value of graded cream and a uniform grading of butter the average for Manitoba was 55c; for Saskatchewan, 54c; and for Alberta, 56c. Manitoba's price was 1c per lb. higher for 1920; Alberta, 4c; and Saskatchewan's, 3c higher. Manitoba had less to advance having enjoyed a higher price for her products in 1919, averaging 24c over Alberta and 3c over Saskatchewan.

## The Need Of the Present

What Is the Real Underlying Cause of the Crime Wave.

Just now, what is the matter with the world is the spread of that poisonous Envy, which masquerading now as Bolshevism, now as heroic radicalism and now as one or another form of Utopianism, seeks to destroy the civilization which humanity has been so long in building.

Since the war, the bellyache apostles have been busy. Everywhere Capital has been assailed as the arch criminal, those who work hard and save their money have been held up to scorn as contemptible bourgeois, violence has been openly preached as the only remedy for the evils of the world, and instead of hard work it is organization for loot that has been glorified. This is the real, underlying, physiological cause of the crime wave.—Dr. Frank Crane.

## Brown Eyes

A prominent English physician, after long observation of the married lives of his patients, declares that in his opinion brown-eyed girls usually make the truest and most reliable wives. Women with gray or blue eyes, he says, are more often extravagant and pleasure-loving.

## Still Untamed

Most of the jagoes in the world today seem to be living in Japan and the United States. Perhaps the reason is that these two countries did

## Takes Up Reins of Government

M. Briand, the famous French Statesman who has accepted the offer of President Millerand and formed a cabinet in succession to Leygues.

## Admiral Advocates Smaller Battleships

Admiral Sims Justifies His Recent Address on the Irish Question.

The importance of smaller naval craft as compared with capital ships was emphasized in an address by Admiral Wm. S. Sims, at Springfield, Mass., recently. Admiral Sims declared that if Germany had had as many submarines at the beginning of the war as she built during the war, "we would now be speaking German in this country."

The admiral urged the need for intelligent interest in the military forces by civilians and closed his address with the statement: "We have lived without the pressure of the probability of war. I do not know what is going to take place in the immediate future, but we may as well have our hands on our guns."

In a statement following his talk, the admiral said that his recent remarks on the Irish question are based on historic facts, and that he would repeat them when the occasion offered. Complaint was made to Secretary Daniels regarding an address made by Admiral Sims.

## When the Motor Skids

Sideward Motion Can be Checked by Proper Steering.

Every driver knows the danger of sudden skid on a wet and slippery road. When your car has started to skid there is no positive way to stop it, but the sideward motion of your car can be checked, and in many cases controlled, by proper steering and careful use of your brakes.

When your car starts to skid you should turn the front wheels in the direction of the skid rather than in the opposite direction. Do not jam on your brakes, for that only locks your rear wheels and causes them to slide more freely toward the side of the road. The brakes should be applied gently and intermittently without throwing out the clutch. If your engine is delivering a little power to the rear wheels you can brake them more effectively, and you avoid the danger of locking them.

Many drivers become frightened at the first sign of a skid and do the very things they shouldn't do. They apply both brakes, throw out the clutch and try to right the direction of the car by steering in the opposite direction of the skid. A clear, cool head will save the day. Leave the clutch in and apply your brakes gently and release them several times and always turn your front wheels in the direction you are skidding.

## Hike From Coast to Coast

F. C. Dill, a former Canadian Pacific Railway brakeman, and his wife, Jenny Dill, both well-known in athletic circles in Nova Scotia, left Halifax recently on a walking expedition to the Pacific Coast. The Dills are the third team to leave Halifax within the past two weeks on a transcontinental hike promoted by the Halifax Herald.

## The Reason for Critics

A literary critic has been defined by somebody as a person who has tried unsuccessfully to write books. By analogy, would an efficiency expert be a person who has tried, unsuccessfully, to run a business?—From the Vancouver Sun.

Beauty is only skin deep, but a sweet disposition extends all the way through.

# The Country Weekly As An Agency In Municipal Publicity

A unique experiment in municipal publicity is being tried out in a number of Saskatchewan rural municipalities. A problem with a good many municipal councils was the lamentable lack of knowledge of municipal affairs which was retarding the progress of the community, and this notwithstanding all the efforts put forth by the government, the municipal association, the school, and the "press." The doings of the council appeared regularly in the local weekly press, as news, of course, and without charge, but the very ratepayers in most need of the information given did not get it for the reason that they are in that class who do not read the newspapers—happily, a class that is growing less numerous, but still numerous enough. To overcome this unfortunate condition municipalities, the council have decided to subscribe for the local weekly paper that serves them for every ratepayer in the municipality; and charge the expenditure up to the taxpayers. This is a radical innovation which will be watched with a great deal of interest. The experiment is not the result of newspaper salesmanship, nor did the idea originate with the weekly press,

says the Moose Jaw Times. It came from the councils which were faced with a problem which publicity of some kind alone could solve. Legislation is the latest municipality to venture on the experiment, with a weekly paper as the medium. The idea, it is true, has been given an impetus by reason of the failure of many other weeklies, which were unable to survive the stressful conditions due to high production costs and lack of local support. The little country weekly is not to be despised. It performs a service to its community that is too often unappreciated until denied. When the little weekly "goes out," there is nothing that will just take its place. We doubt very much if the experiment of municipal subscriptions will solve the problem. Perhaps if municipal councils bought advertising space for the publicity they desire at regular rates, both the council and the paper would be in a better relationship. This is what is done all over the United States, and the practice is making headway in some of the larger cities in Canada, where, more and more, desired publicity is coming to be recognized as a "service" rendered.

## Canada's Resources Need Development

Commission of Conservation Engaged in Study of Problems Associated With Their More Efficient Utilization.

At the annual meeting of a leading Canadian bank held recently, one of the speakers directed attention to the need for more thorough investigation of Canada's natural resources as an essential prelude to the greater development of these resources. The essence of his statement was to the effect that, in this matter of securing greater knowledge and greater development of natural resources, Canada should wake up.

During the past decade the staff experts of the Commission of Conservation have been engaged in the constant study of the extent and character of Canada's resources and of the problems associated with their more efficient utilization. Results of the commission's studies have indicated very clearly that, in regard to many of the Dominion's most valuable resources, the interests of true conservation demand an immediate extension rather than a restriction of development. It has, therefore, been an important feature of the commission's work to promote such development by giving the widest possible publicity to the data it has obtained relating to the extent, situation and character of potential resources. The publications issued by the commission cover a wide diversity of subjects and have been compiled especially for the purpose of rendering them of practical value to the business interests engaged in the development of water powers, forests and other resources.

## Britain and U. S. Should Stand Together

Declaring in an address to the Toronto Canadian Club that he was a patriotic unphlegmatic American, Dr. Paul Shorey, a professor of the University of Chicago, said he had enough common sense to realize that the salvation of the world depended upon the British empire and the United States standing together. If the United States broke with the British, he said, it would be very lonely in a world made up of Germany, Russia, China, Japan and other countries differing from the United States.

Prof. Shorey said there was a systematic effort being made to insinuate into Canada and the United States especially into the American universities, pro-Russian, pro-German and anti-British propaganda through the students' "clubs" which invited lecturers holding such sentiments to address them.

## Buried in Same Church as Gen. Wolfe

In the Greenwich parish church, in the crypt of which General Wolfe, victor of the battle of the Plains of Abraham, is buried, Agent-General Wade, of British Columbia, recently broke the Canadian flag, and unveiled a tablet beneath, to the memory of Lieut. Walter Douglas Read, of the 21st Canadian Regiment, who died in 1919 from wounds received in the Great War.

## How the Telephone Was Invented

Evolution of the Telephone Revealed By Dr. A. Graham Bell.

A romance of the evolution of the telephone was revealed by the inventor, Dr. A. Graham Bell, at a meeting at Derby of the committee of the National College of Teachers of the Deaf.

His early study led him to the conviction that every deaf child should be taught to speak, but he did not believe that it could learn to read the lips with any great profit. That skepticism prompted him to produce a machine that should hear for the deaf.

It required the active persuasion of the deaf young lady who afterwards became his wife to convince him that speech reading was possible. He thus found that the machine which he proposed was not necessary, and it ultimately evolved into the telephone.

One of the most beautiful things to him today, he said, was to see his wife talking with her grandchildren, not one of whom knew the manual alphabet or a single deaf or dumb sign.

## Correcting Erroneous Impression

Department of Immigration Issues Up-to-date Matter For Outside Circulation.

The British and American school children are gaining authentic knowledge of Canada and her resources through the "missionary work" being carried on by the publicity branch of the Department of Immigration and Colonization. Last year more than 100,000 copies of "Canada," an up-to-date descriptive atlas, giving all information regarding the Dominion and the various provinces, were distributed among British school children and some 80,000 were placed in schools in the United States. Although the immigration restrictions at the present time are stringent, officials of the department believe that this publicity will bear fruit when there is some letting down of the bars later.

## Trees on the Farm

Farm forestry makes farming pay better by—

1. Marketing timber profitably.
2. Supplying timber for farm needs.
3. Furnishing employment for men and teams in winter.
4. Making waste lands yield a profit.
5. Increasing the sale value of the farm.

## World's Record Electric Train

An electric train invented by the Russian engineer, Maklono, has beaten the world's record for distance. It covered 150 verbs from Petrograd to Moscow in about twelve hours without recharging. A verst is a Russian mile equal to 3,500 English feet.

Never turn hungry cattle or sheep on alfalfa unless they are used to it and never then if it is moist with dew or rain.

A woman is apt to call a man a flatterer if he says she is handsome, but she gets mad if he doesn't.

## An Appeal For Unity

Drury Argues For Broader National View and Against Class Legislation.

Premier Drury was the principal speaker at the annual meeting and dinner at the Ottawa Board of Trade recently. The premier said since he had been brought in deadly contact with the not head hunters, but head hunters, he was losing some of his agricultural gentleness. The speaker, however, made scarcely any further reference to provincial politics dwelling instead on national ideals and the need of citizens getting into their minds a clear definition of what the nation stands for.

The people of Canada must recognize the value of the human factor, he said, and as evidence that this was being done he instanced the enactment of legislation such as mothers' pensions in Ontario which would have been impossible 25 years ago.

The premier pointed out that he was opposed to class legislation and urged that there must be a better understanding between the farmers and those who were not farmers. There must be a decent standard of living for the man on the farm as well as the man in the city. Farm life must be made bearable for women. It was often said that the farms were undermanned. More often, however, they were under womened.

Men said that labor was unreasonable, he stated, and that the continued demands for higher wages and shorter hours could not be met. Perhaps not, but there has been a great and lamentable development of class consciousness on the part of capital and labor of late, through failure to understand the situation.

Unless it were recognized that man was more than a mere machine they were going to turn him into something dangerous and he was not normally so.

Premier Drury made an eloquent appeal for unity of race and creed in this country, and said that the man who stirred up ill-feeling between Canada and the United States was disloyal to Canada.

## The Spirit of Adventure

Heroic Sports Are Touchstones by Which the Mettle of Peoples is Tested.

There is in the heart of every rugged land valiant people that which demands of its most searching sports the presence of hardship and danger. It is as if nature ever is saying to its elect: "Come with all your skill against my elemental furies and justify, if you can, your claim to the dominion of the world." And, as if man as ceaselessly is replying: "You have given me a spirit that dares to dare beneath purpose, duty, love, death, and I will not be gained; otherwise I should not reign upon earth."

"Only those are fit to live who do not fear to die," said Roosevelt. The heroic spirits of life are the touchstones by which the mettle of peoples is tested in times of peace. Among these are exploration, big game hunting, mountain climbing and other daring adventures of land and sea and air.—H. A. W. Wood in New York Tribune.

## Dairying in Manitoba

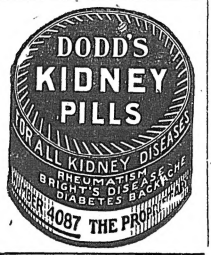

Returns Show Great Increase Over Previous Years.

The value of Manitoba dairy products for 1920 was \$15,599,846, according to the annual report of L. A. Gibson, provincial dairy commissioner.

The report shows that over 25,000 farmers in Manitoba are engaged in dairying and that about 1,000 of these ship milk to Winnipeg for supply of the citizens. Dairy butter is finding an ever-increasing market, owing to the high quality produced.

In order to win success a man must be in a position to grasp opportunity by the back of the neck.

Most men dislike to visit their relatives almost as much as their relatives dislike to have them do it.

W. N. U. 1354

## Appendicitis Prevented Life Lengthened Heal h Maintained

Thousands Finding Wonderful Benefit in a Simple Home Remedy That Costs But a Quarter.

Doctors say if people kept their bowels in proper order there would be no such disease on record as appendicitis. It is due solely to neglect, and is therefore preventable. If you have constipation, bad breath or headache you need medicine right away.

The moment you suspect your bowels are clogged you should take Dr. Hamilton's Pills, the smoothest regulator of them all. They move the bowels and cleanse the liver so smoothly you scarcely notice the effect. But you can get the action just the same. Taken at night you will be up in the morning fresh-headed, hungry, rested, energetic, feeling like a different man.

Why don't you spend a quarter to-day and try Dr. Hamilton's Pills. They work so easy, just as nature would order, never gripe or cause headache. First thing that you feel is that you are out of your distressed, backed in color and spirits.

Folks that take Dr. Hamilton's Pills are never sick, never have an ache or a pain—feel good all the time simply because their system is clean, regulated and healthy. This you can easily prove yourself.

## "Better Farming" Trains

Educative Value of Programme Cannot Be Lightly Estimated.

"Better Farming" trains have been long used in Western Canada as a means of bringing to the notice of the farmers the best methods of farming. These trains go from station to station throughout the country. At each stop lectures are given on various phases of farming by competent agriculturists and livestock men. Hitherto the "Better Farming" trains have generally been operated during the summer months, but this year one is visiting various parts of Saskatchewan during the winter months.

One car in the train is especially devoted to dairying and another to field husbandry. The programme in the former includes addresses dealing with the formation, improvement and management of a dairy herd, as well as the handling and marketing of dairy products.

In the field husbandry car lectures are given on general problems of crop production, special attention being paid to matters of farm management, rotation and growing crops, but matters directly relating to dairying and livestock will be the chief features. Moving pictures are shown, giving information on various lines of dairying and livestock work, while the addresses will be illustrated by lantern views.

## World's Largest Buzz Saw

Is Nine Feet High and Weighs 795 Pounds.

The largest buzz saws in the world were recently installed on the Pacific coast to cut the enormous cedars of that region. They are nine feet high, and in the rim are inserted 19 detachable teeth, which can be easily replaced if broken. Each saw started out as an ingot weighing 1,140 pounds, and after heating, rolling and trimming, each weighed 795 pounds. Tremendous difficulties attend the making of such huge implements of industry. The ingot must be fashioned into a plate absolutely straight and true. The saws in operation attain a speed of 130 miles an hour, a bit of statistics hinting at the revolution in sawmill methods since modern demand outstripped old-fashioned means of supply. Circular saws have been in use for over a century, being of English invention, but the insertible teeth was the development of an American idea.—New York World.

## Queen-Mother and Her Arm

The Gallant Remark of an Irish Gentleman Earns a Pat on the Arm.

Queen Alexandra is quite herself again, and she goes about freely among her private friends. This week she paid one of her unexpected, unceremonious visits to a little flat in Belgrave, and over the tea-cups she said: "Ah, me, I'm 76, and as I'm Queen on all the world known by!" "Well," remarked an Irish gentleman present, "that's the only way they could know it. Otherwise, they would think you 27."

The Queen patted him on the arm, as if to say, "It's very nice of you to think of that."—London Sunday Chronicle.

Advertisements in newspapers were not general in England until the beginning of the eighteenth century.

The re-created state of Poland consists of 120,000 square miles, with a population of 21,000,000.

## London to New York by Air

Newest Type of British Aero-Engine Develops One Thousand Horsepower.

The successful testing of a 1,000 horsepower aero engine which is said to be the most powerful known, has opened up claims by experts of the possibility of a regular London-New York aerial service and a complete passage within 24 hours; either direct or by changing aircraft at the Azores Islands. It is being recalled by the experts that Capt. John Alcock, in 1919, flew from Newfoundland to Ireland in less than 16 hours, using two 375 horsepower engines.

The new engine is called "The Cub." It was ordered by the Royal Air Force. It is understood that the "Titanic," a flying boat destroyer, which is to be used in long distance patrols, will be equipped with two "Cubs," and have a range of 1,500 miles. For wartime the crew will number ten and for civilian use the craft can accommodate 50 passengers. "The Cub's" 18 cylinders, on a test, indicated 1,057 horsepower in 20 hours of running. The engine weighs nearly a ton and costs about £5,000.

## Canadian Fruits in Britain

Canadian Fruit Commission Suggests Energetic Advertising to Increase Sales.

As a means of popularizing Canadian fruits in Britain, the proposal has been made that a "Canadian Fruit Week" will be held next year, according to a report of J. Forsyth Smith, fruit trade commissioner.

Mr. Smith states that a national apple day may be held next year as a part of a general campaign of advertising.

Speaking generally on the condition of the apple market in Great Britain, Mr. Smith remarks that a large part of the consuming public cannot afford apples at 14c to 20c a pound. Under government control the consumer is supposed to be charged 10 pence a pound. Retailers are charging that figure, though in some cases the profits are as high as 90 per cent. Apples on which this profit was made were Golden Russets.

A note added to Mr. Smith's report states that the British Ministry of Food has removed all restrictions on the importation and control of fruit as from March 31, 1921.

## Appoint Official Rainmaker

Said That Number of Settlers Are Coming From United States on Strength of Contract.

Final arrangements have been made at Medicine Hat by the United Agricultural Association for the coming of Rainmaker Hatfield to this district in April and it is announced that the main plant will be situated at Chapin Lake, about 20 miles from Medicine Hat. Farmers in general are highly enthusiastic over prospects, and it is said that on the strength of Hatfield's operations a considerable number of settlers from the United States will locate in the vicinity. According to the contract which has been negotiated, Hatfield is hereby to construct and build a rain precipitation and attraction plant at a favorable site, to be chosen by him for its operation, to be kept in constant operation from the first day of May, 1921, to the first day of August, 1921, in the endeavor to bring about the largest possible increased precipitation over and above that portion of Alberta, Canada, and section of territory at least 100 miles radius, with the city of Medicine Hat, Alta., as a centre.

Hatfield will install a standard rain gauge at his place of operations, and two other rain gauges shall be placed in various portions of the district as may be agreed upon by the parties hereto mentioned, and the measurements of said three rain gauges shall determine the average rainfall over the aforesaid district as final in the premises. The amount of the contract is \$8,000.

## Profited By War

Estimated Wealth of Great Britain is \$230,000,000,000.

The British Empire profited most as a result of the war, according to financial reports from foreign and domestic sources received by the Savings Banks Association of New York State. The total estimated wealth of the principal countries involved in the war is \$819,000,000,000, against \$698,000,000,000 in 1914. The estimated wealth of Great Britain now is \$230,000,000,000, against \$130,000,000,000 when the war started, and the United States \$300,000,000,000, a gain of \$5,000,000,000 since 1914.

Through Greeting. He—"Do you think you could grow to love me?" She—"I'm afraid not. You see, I've done growing."

It takes a joint of beef to make a Bottle of Bovril

# Bovril

Has Not Changed Since 1914

Same Price. Same Quality. Same Quantity.

## What Business Needs

Permeating Labor, Capital and Management With Integrity, Loyalty and a Desire to Serve.

"The future of American business depends on the developing of the soul of the man and upon again permeating labor, capital and management with integrity, loyalty and a desire to serve. The need of the hour is not more salesmen, or more foremen, or more technical men, but the need of the hour is to get employers and wage-workers to give their hearts to God. Business depressions can be avoided, but only by redirecting the views of your people to the need of integrity, industry and thrift. Business conditions can be changed for the better only as man's attitude toward life changes."—Roger Babson.

## Value of Farm Products Or the Prairie

Total Value of Products For Three Prairie Provinces Amount to \$471,671,823.

Products of the soil of the three prairie provinces of Canada in 1920 reached a value of \$471,671,823, an increase of \$67,232,911 over the preceding year, according to statistics compiled by the Manitoba Free Press. The figures on grain are for the last four months of the year, but all the others cover the full twelve months. The value of grains increased from \$206,917,690 in 1919 to \$299,438,880 in 1920. Dairy production is valued at \$71,839,966 in 1920 compared with \$71,458,441 in 1919.

## \$10,000 For Vets.

An emergency grant of \$10,000 is to be given at once to the provincial command of the Great War Veterans by the Alberta Government for the purpose of meeting the unemployment situation now obtaining in the province among ex-soldiers.

If a man is a chronic grumbler it always makes him happy to find a button off his coat when his wife is busy.

Camel teams furnish the only freight service on the 210 miles between Tibobourra and Broken Hill, N.S.W.

## Women! Use Diamond Dyes

Dye Old Skirts, Dresses, Waists, Coats, Stockings, Drap'ries.

Each package of "Diamond Dyes" contains easy directions for dyeing any article of wool, silk, cotton, linen, or mixed goods. Beware! Poor dye streaks, spots, fades, and runs material by giving it a "dye-dog." Buy "Diamond Dyes" only. Druggists have Color Card.

## Unique Holiday Plan

Custom Practised in Denmark Has To Commend It.

Canadians can learn much from the work, methods, customs, industry and educational system of Denmark, besides how to raise hogs for profit and to make gilt-edged butter.

An exchange tells of a very unusual and practical Danish custom for spending summer holidays. This article says that a custom prevails in Denmark that can hardly fail to bring nearer together the residents of town and country and make a fellowship between families whose lives, but for that custom, might never come in contact with one another. Residents in the towns send their children to the country for the summer holidays, and take in exchange for them country children, to whom the sights of the city are a novelty. The school children of city and country leave their homes by thousands, and change places with one another. It is estimated that Copenhagen alone sends ten thousand school children to the rural districts, and entertains the same number in return.

## The Right Spirit.

The London, Ont., unemployed who are going to technical schools while idle, in order to improve themselves in mechanical theory in their special lines, show the right spirit. In the new period for industry, efficiency and skill will get first choice; and special training will be a greater asset than ever to a worker.—Toronto Mail and Empire.

## Tragic Contrast.

It is the grimest piece of irony one knows of that while British ex-soldiers are walking the streets in destitution and French civilians are still living in holes-in the ground in the devastated areas, the ex-kaiser is a millionaire, enjoying every luxury and receiving from Germany an unending flow of vast wealth already in estimates from two to four million pounds.—London Daily News.

## Canadians Should Know Their Country

A knowledge of one's country should be the first essential of the patriotic citizen's education. Without this knowledge, he is neither prepared to advocate its advantages nor to defend it from depreciatory criticism. Canada has much that her citizens should be proud of, but, unfortunately, this fact is not as well known as it should be by her citizens. Every Canadian should know what Canada's forests, mines, fisheries, wild life and waterways represent to the country. Many thousands go abroad every year and a very large number spend a portion of the winter season in southern climes. Each and every one of these travellers should be a missionary for Canada, spreading knowledge of its many advantages.

The information is available for the asking, the Commission of Conservation, being authorized by Parliament to secure and compile information on Canada's natural resources and to advise the public of the same. The Commission has available many valuable reports, two of which "Water-powers of British Columbia," and "Forests of British Columbia," have been recently issued. They are handsomely illustrated and contain much valuable information on that western province which it would be of advantage for the resident of Canada to know. These reports may be had on request.

## First Advertiser

Speaking at the International Advertising Exhibition, Sir Robert Harne said that the advertisement was, of course, no new thing and he supposed advertisements depended on the art of persuasion that had begun in the garden of Eden when the first woman was as they would have expected, beguiled by the advertisement of a particular class of fruit. Earth, sea and air were occupied by employment of the qualities of various goods. At some future time, perhaps, the Milky Way would advertise some infant food. Sir Robert believed it to be a complete fallacy that the art of advertising a thing must increase its cost. "I believe you

cheapen the goods," he said, "by advertising, for the obvious reason that if advertising increases the sale it increases the number of articles a person can produce at the same cost, and it is obvious in the end that the public get their commodities at cheaper prices than they would on a smaller scale of production."

## U. F. A. Social

### Lorne Proudfoot Chosen By Chinook Local to Stand for Nomination

The U. F. A. Picnic Social held in the Chinook School last Friday evening was a splendid success, and as a result \$76.00 was realized.

During the evening, Mrs. Mitchell and Messrs. Noble and McLaughlin, delegates to the U. F. A. Convention at Edmonton, gave interesting reports on different topics of the Convention.

Messrs. Noble, McLaughlin and Somers were appointed a committee to arrange for putting a candidate into the field for the Medicine Hat Federal Constituency. A motion was carried to request Mr. Lorne Proudfoot to stand for nomination.

A committee was appointed to wait upon the manager of the Pool Hall and all dealers in cigarettes, to see that all minors were being treated by them in accordance with the law.

It was decided to hold a "Hard Time" dance on March 4.

It will pay the parents to take the trouble to get well acquainted with their children, and to take an interest in their pastime. By this means they will learn to trust and confide in you, and are not easily led away by outside influence.

## Pull Together

There should be no "faction" in any town. The property of one individual and every improvement made enhances the value of all property in the corporation. Our town is simply one big family. When this is discarded there is little progress. When there is a united pull for anything its accomplishment is made easy.

## Medals for Men Who Served Overseas

His Majesty the King, has authorized the issue of the British War Medal to members of the British forces who served overseas between the dates of August 5, 1914, and November 11, 1918, and the issue of the Victory Medal to anyone who served on the establishment of any British unit in a theatre of war between the same dates, but claim must be approved by competent military authority.

Demobilized members of the Canadian Expeditionary Forces are requested to send in a permanent address to the Department of Militia to which these medals may be sent when they arrive from England. By calling on the Postmaster a postcard will be supplied for the purpose, which will be forwarded post free to the Secretary, Militia Council.

## Obituary

It is with regret that we announce the death of the thirteen month old daughter of Mr. and Mrs. Lawrence Bury which occurred on Sunday, Feb. 6, after a short illness. The funeral service was conducted by the Rev. G. H. Elliott on Monday afternoon at the home of Mr. Kola, Vanoks.

## Card of Thanks

Mr and Mrs. Lawrence Bury wish to thank all friends for kindness and sympathy shown during their recent sad bereavement.
